Creek Segment A

- Cerro Copper (Property Ownership, Generator)
- Monsanto Chemical Company (Generator)
- ?Cardinal Construction Company (Operator)

Creek Segment A was remediated by Cerro Copper in 1990. A lawsuit seeking cost recovery from Monsanto by Cerro was dismissed in 1995. Site chemical data from Cerro and IEPA indicated contaminants associated with Cerro's discharges and products manufactured by Monsanto.

Creek Segment B

- Cerro Copper (Property Ownership, Generator)
- Monsanto (Generator)
- Wiese Engineering, Inc. (Property Ownership)
- Metro Construction Company/Tony Lechner (Property Ownership)
- Midwest Rubber Reclaiming/Richard Cohen/Stanley Kreitman/Morris Weissman (Generators)
- Ruan Transportation Corp. (Property Ownership, ?Operator, Generator, ?Transporter)
- Waggoner & Company (Former Property Owner, Operator, Generator, Transporter//Defunct)
- Rogers Cartage, Inc. (?Former Property Owner, ?Operator, ?Generator, ?Transporter)
- Rose Stillman (Property Owner)
- Thomas Owen (Property Owner)
- Albert Lauman (Property Owner)
- Robert Clarkson (Property Owner)
- Moto-Gas, Inc. (Property Owner)
- Andrew & Emily Hankins (Property Owner)

Cerro Copper and Monsanto are the only remaining Sauget industries that routinely discharged process wastes into Dead Creek prior to the use of the sanitary sewer system or during periods in which the sewer system was not useable and the drainageway south of Segment A was open (Cerro litigation). Site contaminants are similar to chemicals manufactured at Monsanto's Krummrich plant. Midwest Rubber maintained an outfall to Dead Creek for periodic discharges of process wastes. That corporation was dissolved in the late 1980s (former officers are noted above). Waggoner & Co. (defunct hazardous waste transporter) discharged into the Segment B, allegedly receiving wastes from Monsanto (104e documents). Rogers Cartage and Ruan Transportation are also alleged to have continued these practices at the same location after Waggoner's abandonment. Other names listed above are property owners, most of which are not financially viable.

Creek Segment C-F

- Cerro Copper (Generator)
- Monsanto (Generator)
- Midwest Rubber et al. (Generators)
- Ruan Transportation Corp (?Generator)
- Waggoner & Company (Generator)
- Rogers Cartage, Inc. (?Generator)

Of the industries noted above, Midwest Rubber and Waggoner & Company no longer exist. The other companies are financially viable. Monsanto and Cerro are generators based on plant discharges (Cerro litigation). 104e info notes Monsanto's status as a client of Waggoner & Company and chemical data shows

009183

specific contaminants manufactured at the Monsanto Krummrich plant present in these segments of Dead Creek.

Site G

- Cerro Copper (Property Owner)
- Monsanto (Generator)
- Wiese Engineering (Property Owner)
- Andrew & Emily Hankins (Property Owners)
- Mobil Oil Corp./Socony Oil (Generator)
- Paul Sauget (?Transporter, ?Operator)
- Leo Sauget (Former Property Owner, Operator, Transporter//Deceased)
- Village of Sauget (?Operator)

Site contaminants are identical to chemicals manufactured at the Socony Oil (Mobil Oil) and Monsanto Krummrich plants in Sauget. Documents and placards from Socony and Monsanto were also found in excavations by USEPA in 1995. Paul Sauget indicated unknown wastes from Mobil might have gone to this landfill in a 104e response. Most of the disposal was carried out by a former mayor of Sauget, Leo Sauget (deceased) between the early 1950s and the late 1950s under his property ownership. Wiese Engineering and Cerro purchased portions of the site after disposal activities ceased.

Site H

- Monsanto (Generator)
- Rogers Cartage (Former Property Owner, ?Operator, ?Generator, ?Transporter)
- Doris Tolbird (Property Owner)
- Paul Sauget (?Transporter, ?Operator)
- Leo Sauget (Former Property Owner, Operator, Transporter)

Site contaminants are identical to those produced at Monsanto's Krummrich plant. Disposal activities were conducted during Leo Sauget's ownership of Site H according to aerial photos. A Monsanto 103c reply indicates that unknown chemical wastes from Monsanto may have been transported to a site believed to be this site and Site I. The current property owner is financially unviable.

Site I

- Cerro Copper (Property Owner)
- Monsanto (Generator)
- Rogers Cartage (Former Property Owner, ?Operator, ?Generator, ?Transporter)
- Paul Sauget (Former Property Owner, ?Transporter, ?Operator)
- Leo Sauget (Former Property Owner, Operator, Transporter)
- Village of Sauget (?Operator)
- ?Cardinal Construction Co. (Generator, Transporter)

Wastes in Site I are identical to those produced at the Monsanto Krummrich plant. 103c information indicated unknown Monsanto wastes were transported to a location believed to be Site I. 104e info states the transporter may have been Leo Sauget. Disposal occurred during Leo Sauget's property ownership according to aerial photos. Cerro Copper purchased property after waste disposal activities were over. Cerro litigation material indicated that Cardinal Construction dredged Segment A and possibly disposed of dredgings on Site I.

Site L

- Waggoner & Co. (Former Owner, Operator, Generator, Transporter)
- Monsanto (Generator)
- Rogers Cartage (?Former Owner, ?Operator, ?Generator,

4812

Transporter)

- Ruan Transportation (Property Owner, ?Operator, ?Generator, Transporter)

Site of waste impoundment used by Waggoner & Company. Monsanto was a client of Waggoner & Company (Monsanto 104e reply) and Rogers Cartage and Ruan are alleged to have continued similar activities. The impoundment overflowed to Segment B.

Site M

- Waggoner & Co. (Former Owner, Operator, Generator)
- Monsanto (Generator)
- Rogers Cartage (?Former Owner, ?Operator, ?Generator, ?Transporter)
- Ruan Transportation (Property Owner, ?Operator, ?Generator, ?Transporter)

Former sand pit with hydraulic connection to Segment B. Contaminated creek sediment from Segment B and Site L has migrated into Site M.

Site N

- H.H. Hall Construction Company (Owner, Operator, Transporter, Generator)

Former sand pit operated by defunct road construction company. Nearby residents note disposal of drums with unknown materials at Site N. A portion of the site was formerly owned by Leo Sauget.
